PROFESSIONAL SUMMARY

Results-driven Automation Test Engineer with 3.9 years of experience specializing in Playwright-based automation, API testing, and manual validation. Experienced in creating maintainable automation solutions, optimizing test execution, and supporting high-quality product deliveries in Agile SDLC.

TECHNICAL SKILLS

- **Testing:** Functional, UI, Regression, Smoke, Regression, Re-testing
- **Automation Tools:** Playwright, Selenium
- **Languages:** TypeScript, JavaScript, Java
- **API Testing:** Postman, J-Meter
- **Version Control & Tracking:** Git/GitHub, JIRA, Azure DevOps
- **Databases:** MySQL, SQL, Click House.
- **Others:** SDLC, STLC, Agile Methodology, Manual Testing
- **Analytics Testing :** Google Analytics, Omnibug, GoKwik Dashboard
- **OMS**: SAP Hybris, Magento, Fluent Commerce, Gravity System, Strapi, GoKwick

WORK EXPERIENCE

Automation Test Engineer

Project: SHOPPERS STOP – SS Beauty

- Designed and implemented automated test frameworks using Playwright with TypeScript for web applications.
- Developed Page Object Models (POM) and reusable utilities to improve code maintainability and efficiency.
- Performed functional, smoke, and regression testing across multiple browsers with data-driven execution.
- Ensured stable test runs using Playwright's smart waits and synchronization features.
- Integrated automated test suites with Azure DevOps / GitHub Actions CI/CD pipelines for continuous validation.
- Reported and tracked defects and test progress in JIRA, following Agile/Scrum practices.a

Automation Test Engineer

Project: IHCL

- Designed and executed manual and automation test cases for hotel booking, spa, and events modules.
- Created and maintained automation test scripts using Selenium WebDriver (Java and TestNG) for regression testing.
- Conducted backend validations using MySQL to ensure API - UI data consistency
- Reported defects in JIRA and verified fixes through re-testing cycles.
- Managed test planning, execution, and defect tracking through JIRA for full project visibility.
- Participated in Agile/Scrum activities, collaborating with cross-functional teams to ensure quality deliverables.

Test Engineer

Project: Search Engine

- Tested AI-powered search and recommendation features for accuracy and performance.
- Conducted API testing using Postman for REST endpoints and backend validation.
- Verified recommendation algorithms and relevance across multiple data contexts.
- Validated Google Analytics tagging and event tracking for dashboards.
- Performed data verification using SQL (ClickHouse and PostgreSQL) to ensure report accuracy.

EDUCATION

B.Sc. in Computers

Priyadarshini Degree College, Khammam, Telangana | Graduated Jan 2021

GPA: 70%
